

# Homework 5

Session 5 · Theorem proving (direct, contrapositive, contradiction - disproof by counterexample)

**HOW TO ANSWER**

Every answer carries one sentence of justification. A value on its own is not a solution — say why it is right. You may discuss problems with anyone and may use AI tools, but you must be able to explain every line you submit.

## Part A · ...

**1** TOPIC

Question text. Inline maths  $x^2$ , display maths

$$\int_0^1 x \, dx = \frac{1}{2}$$

**SOLUTION**

Full worked solution.

**2** REFLECTION

A written question — always include at least one.

**WHAT A GOOD ANSWER DOES**

Guidance, not an answer key.
